Eurofins Izmir Gida Analiz Laboratuvarlari Limited
attn. Report
6166 SK. NO:27/A KARACAOĞLAN MAH.
35070 IŞIKKENT/BORNOVA
TÜRKEI

Report date 14.07.2026

Analytical report AR-26-TH-011435-01

Sample Code 296-2026-00011464

[1] Sample name	OSMAN FALAKALI//BAL CICEK - OSMAN FALAKALI//BAL CICEK
Packaging	Plastic cup
Client sample code	180-2026-00029116
Product	Honey
Sampler	Client
Number sample tubes	1
Type of seal	Without seal
Amount	approx. 80 g
Reception temperature	room temperature
Reception date time	10.07.2026
Start / End of analysis	10.07.2026 / 13.07.2026

Test results

Physico-chemical analysis

THH05 Electrical conductivity (20 °C) (#)

Method ICS SOP 510-06 (2021-04)

	Result	Uncertainty	Unit
Conductivity at 20°C	0.27	(± 0.02)	mS/cm

[1]: This information was provided by the customer. Data provided by the customer may have an impact on the validity of the test results and result assessment.

The analysis results and evaluation refer exclusively to the submitted samples and the scope of investigation. The measurement uncertainty not include possible variation by sampling, if not stated otherwise.
The norm "General requirements for the competence of testing and calibration laboratories (DIN EN ISO/IEC 17025:2018, chapter 7.8.6) re to state the decision rule for the consideration of the expanded measurement uncertainty in the conformity assessment analysis results obt for the tested samples. Eurofins Food Integrity Control Services GmbH considers the expanded measurement uncertainty in case the analy results exceed a legal limit or specification value. In case the analysis results do not exceed a legal limit or specification value, the expande measurement uncertainty is not considered. Please contact us, if you have particular requirements differing from this standard procedure in to set up an individual procedure according to your specific needs.

Analytical report AR-26-TH-011435-01

Sample Code 296-2026-00011464

eurofins

THH04 Diastase activity (#)

Method ICS SOP 510-04 (2024-08)

	Result	Uncertainty	Unit
Diastase activity	25.9	(± 2.3)	DN

Authenticity

THH31 Beta-Fructofuranosidase (β-FF) Activity (#)

Method ICS SOP 520-05 (2022-10)

	Result	Uncertainty	Unit
beta-fructofuranosidase activity	<20 *		U/kg

* = below indicated quantification level
(#) = Eurofins Food Integrity Control Services is accredited for this test.

Assessment

THH05/04:

Regarding the examined parameters the sample corresponds to the legal regulations (Honey directive 2001/110/EU, Article 2 in connection with Annex II from June 14th, 2026 and relevant literature: BMEL (2022). Neufassung der Leitsätze des Deutschen Lebensmittelbuchs für Honig. GMBl 2022 S. 429-430).

Remark:
Values in brackets: expanded measurement uncertainty (F = 2.58; 99%).

THH31:

No beta-fructofuranosidase activity could be detected. Regarding the examined parameter the sample corresponds to the legal regulations (Honey directive 2001/110/EC Article 1 in connection with Annex II from June 14th, 2026).

Remark:
Values in brackets: expanded measurement uncertainty (F = 2.58; 99%)

Signature

Scientist Assistant (Lucia Lorenzo Parodi)
